

AMAL BINU

Full Stack Developer

7591995485 • amala2627@gmail.com • Angamaly, Kerala • [linkedin.com/in/cryptadiar](https://www.linkedin.com/in/cryptadiar) • github.com/amalcrypt • amaltech.in

PROFESSIONAL SUMMARY

Full Stack Developer and AI Engineer with hands-on experience designing scalable, production-grade web applications and machine learning pipelines. Skilled in React.js, Next.js, Node.js, Express.js, Python, Django, REST API development, and Firebase. Proficient in blockchain development using Solidity, Ethereum, and Web3.js. Familiar with AWS Cloud, Generative AI, Docker, and CI/CD workflows. Currently pursuing MCA at Adi Shankara Institute of Engineering and Technology.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, Tailwind CSS, TypeScript

Backend: Node.js, Express.js, Python, Django, REST API

Databases: MongoDB, Firebase Realtime DB, MySQL, IPFS, PostgreSQL

Tools: Git, GitHub, VS Code, npm, Docker, CI/CD

Blockchain: Solidity, Smart Contracts, Ethereum, Web3.js

Deployment: Vercel, AWS, Firebase, GitHub Pages

WORK EXPERIENCE

AI Developer Intern | Zecser Business LLP | Real world project

Apr 2026 – Present

AI-powered recruitment platform • Python • NLP • Machine Learning • FastAPI

- Engineered NLP-based resume parsing modules using Python and spaCy to automate candidate profile extraction and structured data output
- Built end-to-end ATS scoring pipelines performing keyword matching, skill extraction, experience relevance scoring, and education classification
- Implemented semantic similarity engine using sentence-transformers and vector embeddings to match resumes to job descriptions with explainable scores
- Designed weighted candidate ranking system with explainable AI scoring across ATS, behavioral, and technical evaluation phases

PROJECTS

Educhain — Decentralized Certificate Verification

Jan 2025 – Mar 2025

React.js • Node.js • Express.js • Solidity • IPFS • Ethereum • liveeduchain.vercel.app

- Built a production-ready full-stack decentralized application (dApp) to issue and verify academic certificates on-chain, eliminating manual paper-based processes
- Developed role-based React.js dashboards and a Node.js/Express.js REST API backend integrated with IPFS for tamper-proof decentralized file storage
- Deployed Solidity smart contracts on Ethereum for tamper-proof on-chain certificate verification, integrated via Web3.js

Zesty — Smart Canteen Management System

Aug 2024 – Dec 2024

React.js • Node.js • Firebase • REST API • Flutter • Real-time Database

- Developed full staff-side web portal using React.js and Firebase Realtime Database covering order management, inventory tracking, and payment workflows
- Designed and documented Node.js REST API endpoints consumed by a cross-platform Flutter mobile app, reducing integration defects through a shared API contract
- Delivered fully automated canteen management system, reducing manual order errors and improving end-to-end processing efficiency across staff and mobile users

EDUCATION

Adi Shankara Institute of Engineering and Technology, Kalady

Aug 2024 – Present

Master of Computer Applications (MCA) | CGPA: 8.25 / 10

Sree Sankara College, Kalady

Jun 2020 – Apr 2023

Bachelor of Science — Chemistry

CERTIFICATIONS

- AWS Cloud & Generative AI: Skills to Jobs Capstone Program — Smartbridge & AWS
